Professional Summary

Final-year Information Technology student with a strong foundation in **Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks**. Experienced in building scalable full-stack applications using **Java, TypeScript, React.js, Next.js, Node.js, PostgreSQL, and REST APIs**. Solved **650+ problems on LeetCode** and demonstrated a strong track record of end-to-end software delivery, rapid technology adoption, and technical problem-solving in fast-paced engineering environments.

Technical Skills

Languages:	Java, JavaScript, TypeScript, SQL, Python
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend & Databases:	Node.js, Express.js, REST APIs, Socket.IO, MongoDB, PostgreSQL, SQL, Prisma ORM
Tools & Concepts:	Git, GitHub, VS Code, Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

Experience

Freelance Full-Stack Developer *2024 – Present*
Self-Employed | Remote

- Engineered a full-stack **Travel Itinerary Platform** using the **MERN Stack**, implementing role-based access control for agents and administrators, dynamic trip builders, and automated client itinerary generation, reducing customized itinerary creation time by **30%**.
- Developed responsive, conversion-focused landing pages for **Android applications and local businesses** using **React.js**, **Next.js**, and **Tailwind CSS**, with a focus on performance, responsiveness, and user experience.

Projects

Socialy / *Next.js, TypeScript, Prisma, PostgreSQL* *2026*

- Built a full-stack social networking platform inspired by **Twitter/X** using **Next.js**, **TypeScript**, **Prisma ORM**, and **PostgreSQL**, supporting user profiles, posts, interactions, and personalized feeds.
- Implemented secure **authentication**, user profile management, posts, likes, comments, and dynamic feeds with optimized **REST APIs** for efficient data retrieval and user interactions.

Chatty / *React.js, Node.js, Express.js, MongoDB, Socket.IO* *2026*

- Developed a full-stack **real-time messaging platform** using the **MERN Stack** and **Socket.IO**, enabling secure login/logout, profile management, and direct communication between team members.
- Implemented **real-time messaging**, active/inactive user presence, three-dot typing indicators, image and media sharing, and message updates using event-driven communication.
- Added customizable **chat themes** and interactive messaging features while designing optimized **REST APIs**, **JWT authentication**, and **MongoDB schemas** for scalable backend performance.

Achievements

- Solved **650+ LeetCode** problems, demonstrating proficiency in **Data Structures**, **Algorithms**, and **Problem Solving**.
- Secured **Runner-Up** at **HackCrux 3.0** by developing a scalable **Contract Farming Platform**.
- Selected as a **Finalist** at **HackJEC 2024** for designing and developing a **Student Management System**.
- Ranked among the **Top 20 teams** in the college-level round of **Smart India Hackathon**.
- Competed in **CodeRumble 3.0**, an **ICPC-style Competitive Programming Contest**.

Education

Jabalpur Engineering College
Bachelor of Technology in Information Technology | CGPA: 7.34/10
